Work Experience

Loft Thai & Nakhon spa portfolio website | Graphics & UX/UI Designer (Mar - Apr 2025)

A web site strengthened both brands' online presence

- Designed high-end responsive web interfaces for Loft Thai and Nakhon Spa using Figma, ensuring seamless accessibility across all devices.
- Blended modern luxury with Thai heritage through bold layouts, Elegant typography and culturally inspired elements.
- Created user flows, wireframes, and interactive prototypes to optimize the booking experience, incorporating stakeholder and user feedback to refine the design.

Nakhon spa Ads & Mobile | Graphics & Video Editor (Apr 2025)

Visually engaging assets and video campaigns

- Developed visually engaging assets and video campaigns for high-traffic locations like Emsphere to drive foot traffic and online engagement.
- Optimized video layouts to ensure brand elegance while standing out in a competitive wellness market.
- Developed engaging visual stories that blend traditional Thai heritage with modern luxury to capture local and international attention.

Next Level Shipping | Lead UX/UI Designer (Nov 2024)

Digital presence and simplify the customer experience.

- Led the UX/UI design process using Human-Centered Design principles, creating clean layouts and streamlined navigation to simplify the customer logistics experience.
- Collaborated with Product Managers and Developers to analyze business requirements and translate them into functional wireframes and mockups.

Sport Complex Management system | Lead UX/UI Designer & Front End Developer (Feb - Dec 2024)

Responsible for overseeing the daily operations of the facility.

- Designed and developed internal workflow systems to streamline staff scheduling and resource allocation, achieving 100% operational efficiency.
- Streamlined internal workflows and task management to improve overall operational efficiency and enhance the customer experience.
- Conducted user research and requirement analysis to streamline internal workflows, designing intuitive dashboards that improved operational efficiency and task management.
